Country Walk CDD 30400 Country Point Blvd Wesley Chapel, Florida 33543

Board of Directors,

We are pleased to present to Country Walk CDD the requested Reserve Funding study. We believe that you will find the attached study to be thorough and complete. After you have had an opportunity to review the report you may have questions. Please do not hesitate to write or call, we would be pleased to answer any questions you may have.

### **Project Description**

Country Walk Community Development District ("Country Walk CDD" or "District") is an independent taxing district created and existing under Chapter 190 of the Florida Statutes. Country Walk CDD is a single family residential development that encompasses 890 lots. Construction in the district started in 2006 and 2007. The site size for the community is 490.77 acres, which includes 60.50 acres for ponds and 199.47 acres for lots. This reserve study focuses on the clubhouse, pool area, recreation areas, monuments, stormwater drainage, and landscaping.

### **Date of Physical Inspection**

The subject property was physically inspected on February 19, 2019 by Paul Gallizzi and Steven Swartz.

#### **Governing Documents**

A review was made of aerials and subdivision plats for the subject property.

### **Depth of Study**

Reserve Study Update with Field Inspection. A field inspection was made to verify the existing condition of the various reserve study components, their physical condition, and to verify component quantities. In place testing, laboratory testing, and non-destructive testing of the reserve study components were not performed. Field measurements of component quantities were made to either verify improvement plan take offs or determine directly the quantities of various components. Photographs were taken of the site improvements.

#### **Summary of Financial Assumptions**

The below table contains a partial summary of information provided by Country Walk CDD for the Country Walk CDD funding study. For the purpose of this report, an annual operating budget was set to \$0, as this report focuses only on reserve items.

Fiscal Calendar Year Begins	October 1
Reserve Study by Fiscal Calendar Year Starting	October 1, 2019
Funding Study Length	30 Years
Number of Assessment Paying Owners	890
Reserve Balance as of October 1, 2019 <sup>1</sup>	\$ 1,504,826
Annual Inflation Rate	2.50%
Tax Rate on Reserve Interest	0.00%
Minimum Reserve Account Balance	\$ O
Assessment Change Period	1 Year
Annual Operating Budget	\$ O

<sup>&</sup>lt;sup>1</sup> See "Financial Condition of District" in this report.

### **Recommended Payment Schedule**

The below table contains the recommended schedule of payments for the next six years. The projected life expectancy of the major components and the funding needs of the reserves of the District are based upon the District performing appropriate routine and preventative maintenance for each major component. Failure to perform such maintenance can negatively impact the remaining useful life of the major components and can dramatically increase the funding needs of the reserves of the District.

#### **Proposed Assessments**

Fiscal Calendar Year	Owner Total Annual Assessment	District Annual Reserve Assessment	Proposed Reserve Balance
2019	\$ 216	\$ 191,900	\$1,389,622
2020	\$ 221	\$ 196,698	\$1,472,766
2021	\$ 227	\$ 201,615	\$1,508,771
2022	\$ 232	\$ 206,655	\$ 1,447,376
2023	\$ 238	\$ 211,822	\$ 1,413,941
2024	\$ 244	\$ 217,117	\$ 1,464,051

<sup>\*</sup> Annual Reserve Payments have been manually modified.

Payments have been modified to smooth payments over time.

Fiscal Year beginning October 1, 2019

### **Reserve Study Assumptions**

- Cost estimates and financial information are accurate and current.
- No unforeseen circumstances will cause a significant reduction of reserves.
- Sufficient comprehensive property insurance exists to protect from insurable risks.
- The District plans to continue to maintain the existing common areas and amenities.
- Reserve payments occur at the end of every calendar month.
- Expenses occur throughout the year, as services are provided.

#### **Impact of Component Life**

The projected life expectancy of the major components and the reserve funding needs of the District are closely tied. Performing the appropriate routine maintenance for each major component generally increases the component useful life, effectively moving the component expense into the future which reduces the reserve funding payments of the District. Failure to perform such maintenance can shorten the remaining useful life of the major components, bringing the replacement expense closer to the present which increases the reserve funding payments of the District. Also, some reserves items may have the phrase maintenance after it. These reserve items are something that would not be fully replaced at one time, but a small portion may have to be replaced periodically.

#### **Inflation Estimate**

Inflation has been estimated at 2.50 percent over the course of the study.

#### **Initial Reserves**

Through January 31, 2019, there was \$1,504,826 set aside for reserves. These numbers were obtained from the District on the January 2019 balance sheet. The projected reserve balance on October 1, 2019 is \$1,504,826. October 1, 2019 starts the next fiscal year. September 30, 2020 marks the end of the fiscal year.

#### **Financial Condition of District**

The pooled method reserve projections estimate \$215.62 per owner per year in fiscal year 2019-2020 and \$191,600 in total funding.

At the current time, the District is considered to be 198 percent funded. This represents a very well funded status. The higher the percent funded, the more likely a District is to avoid a special assessment.

The following are general measures to the health of a District based on the percent funding model: 0-

30% funded: poorly funded 30-70% funded: fairly funded 70-100% funded: well funded

Country Walk CDD Funding Study Summary - Continued

100+% funded: very well funded

#### **Special Assessments**

No reserve items will require special assessments if the funding schedule is followed. However, funding less than the suggested amounts will likely result in special assessments or for the replacement of an item to be delayed.

### **Reserve Funding Goal**

The reserve fund is set to be as close to Fully Funded as possible on an annual basis.

#### **Study Method**

Funding studies may be done in several ways, but we believe that the value of a funding study lies in the details. "Bulk" studies are quick, usually inexpensive, and almost always border on worthless. We believe that meaningful answers to funding studies lie in the details. This approach is pragmatic, and allows human judgment and experience to enter into the equation.

Unless noted otherwise, the present cost of every reserve item in this report has been estimated using the "National Construction Estimator", a nationally recognized standard, and modified by an area cost adjustment factor. Where possible, known costs have been used. In addition, every reserve item has been given an estimated remaining useful life, an estimated useful life when new, and has been cast into the future to determine the inflated cost.

Equal annual payments are calculated for each reserve item based upon a payment starting year and a payment ending year using the end of period payment method. Interest earned on accumulated reserve funds and taxes on the reserve interest are also calculated. Initial reserve funds are consumed as expenses occur until fully depleted, reducing annual reserve payments to a minimum. As you review this report, we are certain that you will appreciate the level of detail provided, allowing you to review each reserve item in detail.

#### **Summary of Findings**

We have estimated future projected expenses for Country Walk CDD based upon preservation of existing improvements. The attached funding study is limited in scope to those expense items listed in the attached "Country Walk CDD Reserve Study Expense Items". Expense items which have an expected life of more than 30 Years are not included in this reserve study unless payment for these long lived items overlaps the 30 Years reserve study envelope.

Of primary concern is the preservation of a positive funding balance with funds sufficient to meet projected expenses throughout the study life. Based upon the funding study, it is our professional opinion that owner monthly fees as shown in the attached "Country Walk CDD Assessment Summary" will realize this goal. Some reserve items in the "Revenue Summary Table" may not contain payments. In this analysis the initial reserves were used to make annual payments for expense

items in their order of occurrence until the initial reserve was consumed. As a result reserve items without payments may be expected, particularly in the first few years of the funding study. Reserve items that have been paid with initial reserve funds are identified with a [FP] in the Expense Items Sheets. An item marked [PR] is partially paid with initial reserve funds. Country Walk CDD represents and warrants that the information provided to us, including but not limited to that information contained in the attached Reserve Study Information Summary, that the maintenance records are complete and accurate, and that we may rely upon such information and documents without further verification or corroboration. Where the age of a particular Reserve Item (as listed in the Reserve Study) is unknown, Country Walk CDD shall provide to us Country Walk CDD's best-estimated age of that item. If Country Walk CDD is unable to provide and estimate of a Reserve Item's age, we shall make our own estimate of age of the Reserve Item. The Reserve Study is created for the District's use, and is a reflection of information provided to us. This information is not for the purpose of performing an audit, historical records, quality or forensic analyses. Any on site inspection is not considered to be a project audit or quality inspection. The actual or projected total presented in the reserve study is based upon information provided and was not audited.

#### **Percent Funded**

Many reserve studies use the concept of "Percent Funded" to measure the reserve account balance against a theoretically perfect value. Percent Funded is often used as a measure of the "Financial Health" of a District. The assumption is, the higher the percentage, the greater the "Financial Health". We believe the basic premise of "Fully Funded" is sound, but we also believe that the validity of the Fully Funded value must be used with caution.

To answer the question, some understanding of Percent Funded is required. Fully Funded is the sum of the depreciation of all the components by year. To get the Percent Funded, divide the year end reserve balance by the Fully Funded value and multiply by 100 to get a percentage. The concept of Fully Funded is useful when the reserve study is comprehensive, but misleading when the reserve study is superficial or constrained. As a result, we recommend that the statement "Percent Funded" be used with caution.

#### **Keeping Your Reserve Study Current**

We believe that funding studies are an essential part of property management. People and property are constantly changing and evolving. As a result, the useful life of a funding study is at best a few years, and certainly not more than five years. This reserve study should be updated:

- At least once every few years
- At changes in the number of assessment paying owners
- Before starting new improvements
- Before making changes to the property
- · After a flood or fire
- After the change of ownership or management

• After Annexation or Incorporation

### Items Beyond the Scope of this Report

- Building or land appraisals for any purpose.
- State or local zoning ordinance violations.
- Building code violations.
- Soils conditions, soils contamination or geological stability of site.
- Engineering analysis or structural stability of site.
- Air quality, asbestos, electromagnetic radiation, formadehyde, lead, mercury, radon, water quality or other environmental hazards.
- Invasions by pests, termites and any or all other destroying organisms, insects, birds, bats or animals to buildings or site. This study is not a pest inspection.
- Adequacy or efficiency of any system or component on site.
- Specifically excluded reserve items.
- Septic systems and septic tanks.
- Buried or concealed portions of swimming pools, pool liners, Jacuzzis and spas or similar items.
- Items concealed by signs, carpets or other things are also excluded from this study.
- Missing or omitted information supplied by the Country Walk CDD for the purposes of reserve study preparation.
- Hidden improvements such as sewer lines, water lines, irrigation lines or other buried or concealed items.

#### **Storm Water Overview**

Country Walk has an overall land area of 490.77 acres and a density of 0.55 dwelling units per acre comprising 890 home sites. The drainage for the district is comprised of 29 retention ponds consisting of 60.50 acres. There is a pond shoreline of 37,060 linear feet.

The ponds have been constructed to engineering standards that include proper slopes and shore line stabilization which includes erosion protection and approved backfill materials such as soils with a high clay content covered within 2 inches of sand. A reserve is established in this study for shore line restoration.

The entire residential area including all roads and open areas have a complete drainage system. Overall, there are 309 drainage structures including 64 mitered end section outlet structures, 211 inlets, 27 manholes, and 7 outfall structures. In addition, there is 28,221 feet of reinforced concrete piping ranging in size from an 18 inch diameter, to a 30 a inch diameter, as well as 620 feet of 6 inch PVC Pipe.

Country Walk Storm Water Pipes

Diameter Length Cost/LF Amount

Country Walk CDD Funding Study Summary - Continued

6" (PVC)	620'	27.00	\$16,740
18"	19764'	60.00	\$1,185,840
24"	5484'	84.00	\$460,656
30"	2973'	108.00	\$321,084

 Outfall Structures
 7@4000 = \$28,000 

 Manholes
 27@2650 = \$71,550 

 Mitered End Sections
 64@1800 = \$115,200 

 Inlets
 211@3500 = \$738,500 

Grand Total \$2,866,020

#### **Stormwater Drainage Notes**

In general, the drainage system including drainage structures and drainage pipes have a long indefinite lifespan. These improvements, however, may encounter problems from natural causes such as settlement or tree roots and man made causes such as excavations or poor original design or poor construction. For the purpose of this reserve study, it is our opinion that one percent of the original system cost should be set aside for reserves annually.

It has therefore been deemed necessary to set up a reserve for repair and replacement of the CDD owned drainage improvements. In this case, the total system cost is estimated to be \$2,866,020, which would result in a yearly reserve of \$28,700. It should be noted that there are additional reserves for pond bank erosion. The amounts shown in this reserve study should be analyzed and adjusted in future reserve studies based upon actual expenditures for such items.

#### **Drainage Pond Maintenance and Reserves**

Drainage ponds require routine and non-routine maintenance. Routine maintenance includes mowing debris removal and catch basin cleaning. Mowing on a regular basis enhances the aesthetics of the area as well as helping to prevent erosion. Proper mowing of the banks helps the ground cover maintain a healthy root system, which minimizes erosion. Trash, debris, and litter removal reduces obstructions to inlets and outlets allow the storm water system to function as designed. Cleaning catch basins is also considered routine maintenance. For the purpose of this reserve study, the cost of routine maintenance is not a reserve item.

Non-routine maintenance is a reserve item. Non-routine maintenance includes bank erosion and stabilization, sediment removal, and structural repairs and replacement. From time to time, some of these ponds may encounter erosion of their banks and require repairs. All ponds react differently due to original construction, slope of the bank, soil or environmental conditions, and other factors.

In Country Walk CDD, there are 29 retention ponds for stormwater drainage. These ponds are estimated to have 37,060 linear feet of shoreline area. It is not likely that all of the shoreline area will

Country Walk CDD Funding Study Summary - Continued

erode and need to be replaced. We have estimated that approximately 5 percent of the shoreline will erode and need refurbishment over a 5-year period. The District recently completed a shoreline refurbishment project in a few areas. From time to time, some of these ponds may encounter erosion of their banks and require repairs. All ponds react differently due to original construction, slope of the bank, soil or environmental conditions, and other factors. An erosion control reserve for repair of ponds is necessary for the proper upkeep in the district. This number can be adjusted in future reserve planning if necessary.

### **Landscaping Notes**

In Country Walk CDD, there are 3 distinct areas of landscaping, as evidenced by community documents. The three areas are plants, plants and turf, and turf. The plants section has 6,340 SF of area, the plants and turf has 443,626 SF of area, and the sod has 1,285,284 SF of area. The estimated replacement cost of the landscaping is \$1,216,070.

In general, landscaping of shrubs has about an 8-year life and landscaping of turf has about a 15-year life. However, certain areas and shrubs may need to be replaced at different times due to varying conditions, such as proper accessibility to irrigation, original design, precise location, and the weather. It is not likely that multiple areas will need to be replaced at the exact same time. As a result, we think that a phased reserve fund would be more appropriate. Since most of the landscaping is the longer lasting sod, a weighted estimated lifespan of 13 years was used, resulting in a yearly reserve fund for landscaping of \$93,500.

#### **Statement of Qualifications**

Paul Gallizzi and Steven Swartz are professionals in the business of preparing reserve studies and insurance appraisals for community associations. We have provided detailed analysis of over 300,000 apartment, villa, townhome, and condominium units. We have prepared insurance appraisals and reserve studies for all types of community associations including high rise condominiums, midrise condominiums, garden-style condominiums, townhouse developments, single family homeowners associations, etc. We both hold engineering degrees from fully accredited universities. Paul Gallizzi is a State Certified General Real Estate Appraiser License Number RZ 110 and a State Certified General Contractor License Number CGC 019465. Steven Swartz is a designated Reserve Specialist, RS No.214, from the Community Associations Institute as well as a State Certified General Real Estate Appraiser License Number RZ 3479.

#### **Conflict of Interest**

As the preparer of this reserve study, we certify that we do not have any vested interests, financial interests, or other interests that would cause a conflict of interest in the preparation of this reserve study.

Country Walk CDD Funding Study Summary - Continued

We would like to thank Country Walk CDD for the opportunity to be of service in the preparation of the attached Funding Study. Again, please feel free to write or call at our letterhead address, if you have any questions.
